Hiring Manager

Rwanda Information Society Authority (RISA)

Kigali, Rwanda

Subject: Application for Developer Position

Dear Hiring Team,

I am excited to apply for the Developer position at RISA. With a strong foundation in Computer Science from Adventist University of Central Africa and hands-on experience as a Django developer at Solvit Africa, I am eager to contribute to Rwanda's digital transformation initiatives.

At Solvit Africa, I developed a Finance Tracker using Django REST Framework, React, and MySQL—building secure authentication, RESTful APIs, and user-focused features. This experience honed my skills in Python, database management, and collaborative development using Git, while maintaining clean, testable code.

What inspires me about RISA is the opportunity to create scalable, secure systems that serve public institutions. My experience in designing practical digital solutions, like budget-tracking tools, aligns with your mission to provide accessible and efficient services. I am particularly motivated to work on system integration and secure web applications that directly impact Rwanda's digital ecosystem.

I would welcome the opportunity to discuss how my technical expertise and commitment to Rwanda's digital future can benefit your team. Thank you for your time and consideration, and I look forward to your response.

Best regards,

Kwizera Dieudonne
